

AI-Powered Project Management for Caring Leaders:

Managing Risk, Schedules, and Your Team with Compassion and Empathy

Project Managers, will we be replaced by Artificial Intelligence (AI)? Perhaps not. However, project managers who understand how to apply AI in the workplace will almost certainly replace those who choose to ignore or avoid it!

We are experiencing a technological breakthrough that has no historical analogy to provide perspective. The power of AI is so great as to not be understood by those closest to it, as witnessed by the turmoil within the industry itself. The power being unleashed is unimaginable and seemingly untamable, and yet, tame it we must!

Now more than ever we need to bring our humanity to the workplace. Emotional intelligence, empathy, and compassion are leadership qualities that are based on feelings. The ability to integrate logic with emotions and apply them toward a positive outcome is a uniquely human characteristic. How well a machine can emulate these traits is as much a philosophical question as it is a technological one.

As leaders in the workplace, we have a moral obligation to be more than a witness to this evolution. We must work hard to understand it and to harness it for good. In embracing this technology as a tool, we will be able to solve problems in seconds that would take even the most impressive mathematicians among us minutes, hours, or even days to solve.

Working collaboratively with our colleagues we can resolve previously unresolved problems such as resource optimization across functional hierarchies. Using data to drive decision-making will drive a new power structure, rather than a power structure driving priorities that are at odds with what is best for the business or enterprise.

We hope you'll join us for an exploration of this exciting new era in project management. Discover the latest tools that you can use to propel your teams into the future of project management!

Learning Objectives:

Attendees will:

- Learn to use Generative AI to facilitate project risk and schedule management
- Integrate concepts of positivity and happiness to improve team engagement
- Discuss and analyze the ethical use of Generative AI technology

PDU: 20 total PDUs

- Business Acumen - 4
- Ways of Working - 8
- Power Skills - 8

Agenda

Wednesday, April 24, 2024 - 4:30pm-6:30pm

- Cocktail reception

Thursday, April 25, 2024 - 9:00am - 5:00pm

Projects, Problems, and the Personal Touch

- Generative Artificial Intelligence
 - What we know about AI
 - What we understand about AI (and what we may not)
 - Applications
- Project Risk Management
 - Identifying uncertainty
 - Driving successful outcomes
 - Generative AI tools
- Ethics and AI
 - Ethics in the age of AI
 - Challenges in the workplace
 - A call to action

Friday, April 26, 2024 - 9:00am - 5:00pm

Intelligence: Real, Imagined, or Artificial?

- Prompt Engineering
 - Learning models
 - Prompting techniques
 - Ethics and accuracy
- Project Estimating and Scheduling
 - Imagined estimates-real schedules
 - Classics really are classic
 - Generative AI tools
- Value Stream Management
 - A systems approach
 - Flow measurement and control
 - Value realization

Saturday, April 27, 2024 - 9:00am - 1:00pm

Group Activity

- Application of Generative AI in project management
- Inclusion of an emotional element
- Artifact collection

Team Presentations

- Multi-media demonstration of Generative AI using artifacts

**We look forward to having you join us as we
*Teach at the Beach!***
