

The Certified Associate in Project Management (CAPM)[®] Exam Prep Course

The CAPM[®] shows the world that you possess the foundational knowledge and skills that project teams demand. It proves that you're ready to take on a wide range of projects too—with ways of working that include predictive project management, agile principles and business analysis. Earning your CAPM equips you with all you need to start a career in project management.

The newly updated, 3 hour, 150-question CAPM certification exam tests your aptitude on Project Management Fundamentals and Core Concepts. To sit for the exam, you must meet the following CAPM requirements:

- Have a secondary degree, such as a high school diploma, GED (general educational development), or global equivalent
- Have at least 23 hours of project management education completed before the exam (our course fulfills that requirement)

Updates to the exam include:

- Agile Frameworks/Methodologies
- Business Analysis Frameworks
- Predictive Plan-Based Methodologies

The CAPM certification is essential to gain entry and start building your career as a project manager. It also positions you to pursue any of the major certifications including the gold standard in project management certification, the [Project Management Professional \(PMP\)[®]](#).

Consider getting the CAPM[®] Certification if you'd like to:

- Start an exciting career in project management
- Build on your current skill set and differentiate yourself in your profession
- Power your career as you lay the foundation for the Project Management Professional (PMP)[®]

(CAPM certification meets the education/training requirement for PMP certification)

CAPM[®] Certification tests your knowledge through:

- Fundamentals of project management and the role of project managers
- Project management environment, and project iteration management
- Project scope, schedule, cost, quality and resource management
- Project procurement, communication, stakeholder and risk management
- Predictive, agile, and business analysis principles
- PMI's 2021 *Talent Gap: Ten-Year Employment Trends, Costs and Global Implications*
