

Project Managers for the Planet: Sustainable Solutions for Project Success ***Align Your Projects with Global Sustainability Standards and Make an Impact***

Abstract

Unlock the power of sustainability in project management with our comprehensive 8-hour Green Project Management (GPM) workshop! In today's world, it's not enough to deliver projects on time and within budget – you also need to ensure they create lasting positive impacts. This workshop will equip you with the skills and tools to integrate sustainability into every stage of project planning and execution. Learn how to apply the P5 Standard, align with the UN Sustainable Development Goals (SDGs), and perform P5 Impact Analysis to assess and enhance your project's social, environmental, and economic contributions.

Whether you're a seasoned project manager or just starting your sustainability journey, this workshop will empower you to lead with purpose and make a difference. Register today and be part of the movement driving both project success and a greener future!

Learning Objectives

Attendees will:

- Understand the principles of Green Project Management
- Gain the skills to implement the P5 standard for sustainability across various project dimensions (People, Planet, Prosperity, Process, Product)
- Understand how to align your project objectives with the United Nations Sustainable Development Goals (SDGs) for greater impact
- Learn to evaluate the environmental, social, and economic impact of your projects using the P5 Impact Analysis methodology
- Explore the benefits of GPM-b certification and how it enhances your career and project outcomes

PDU Breakdown by Talent Triangle Areas

8 PDUs: 3 Power Skills, 3 Business Acumen, 2 Ways of Working
